APACZAI TRAINING CENTRE – HUNGARY
OUR SCHOOL
HU-2012-LEO-PA-6049
MEETING IN ITALY
MARCH, 2013**

- **Our school opened its gate in 2007.**
- **We have two divisions, day and night school.**
- **Our teachers are well-educated and possess superlative professional knowledge.**
- **They are all open-minded and friendly towards the students.**

Aims:

The aims of the institution meet up with the European requirements. This is our first task to reach this standard. On behalf of this we would like to put through not only the hungarian traditions towards our students also achieve the European norms. We ensure such a modern general and professional knowledge so our students will be qualified to take the school leaving and vocational exam. After that they have possibility to apply for a proper job and they have a greater chance to get into college or university.

Education, training forms

- ❖ high school (full-time education)
- ❖ vocational school (full-time) 16 to 23 years
- ❖ secondary vocational school (daytime and evening work schedule)
- ❖ „catch-up” training (full-time)
- ❖ Adult education (evening gymnasium) from 18 to 99 years, high school youth section (full-time training class) 16 to 20 years

And this is our school, The Apaczai Training Centre. We have nearly 600 students. They can choose a profession or take a school leaving exam too.

The school is situated in one of the most disadvantageous area in Hungary, where we have a lot of disadvantaged students from the minority group of Roma people (almost 50%). For these students we organize special “catch-up” courses to be able to get into the vocational education. We have to pay special attention to their integration. The Institute's staff and teachers are out to integrate them into the school system and the society and everyday life on maximum level.

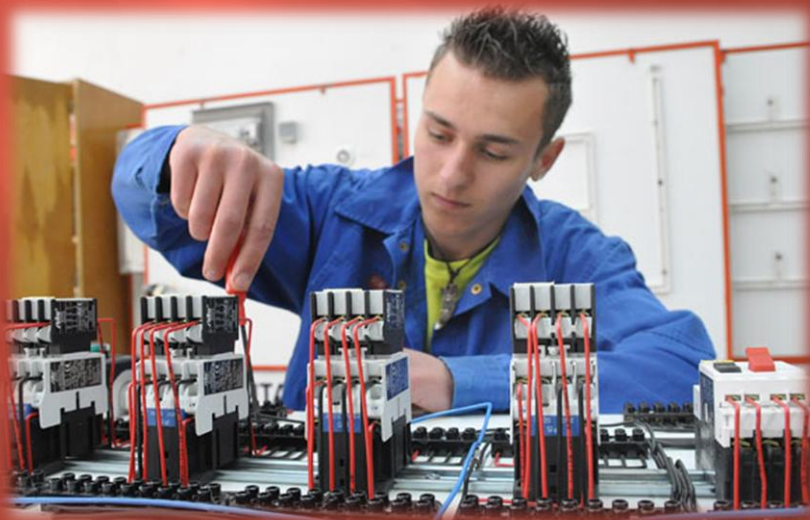

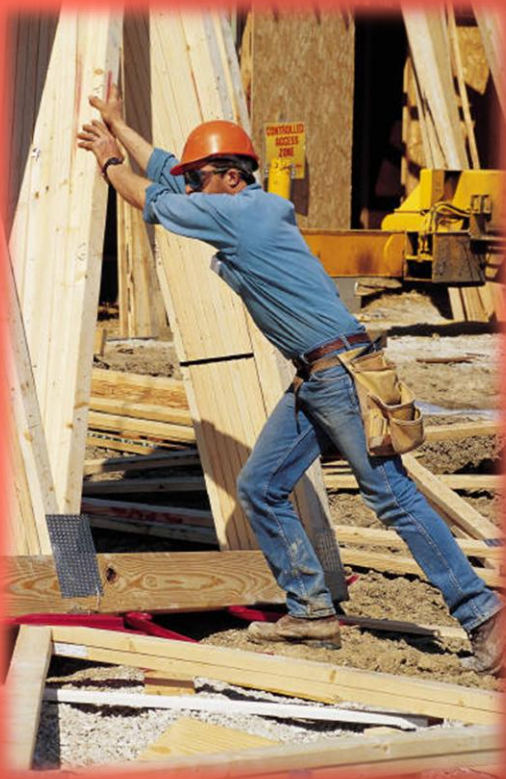

The most popular professions of last years were the hairdresser and the cosmetician.

Nowadays waiters and cookers are in request. We have got vocational classes in all year at the moment.

**Our plans for the future to start
courses for bricklayers,
electricians, welders, plasterers**

bakers, confectioners, social workers and shop assistants.

Cultural experiences

Philharmonic

Theatre

Concerts

Christmas and Carnival Celebrations

Exhibitions

We participate in different national and international projects.
